

### **Practical Skills Task 3**

This task must be completed, by hand, and brought to your first chemistry lesson. It is based on a practical very similar to one you may have done at GCSE. We encourage you to research but please get used to referencing any sources you use. We do not require a specific style of references but simply a URL for any website you've used with the date you accessed the website on. You can also reference textbooks and other sources of information.

Please ensure that you spend a good amount of time on this as it can be used to tick off certain practical skills required for the practical endorsement qualification.

When doing research, remember to use reliable sources e.g. when using videos - Royal Society of Chemistry or Malmesbury Education
